Languages

Mother Tongue:

English

Second Language:

Czech

Afrikaans fluency

Programming

Java

C

Python

C++

Android

VHDL

Verilog

MatLab

Octave

Extensive unix usage

Architectures

STM32F0

STM32F4

Raspberry Pi

Arduino

Galileo

Xilinx Cyclone II

Xilinx Artix 7

Education

2012–now

Bachelor of Engineering

The University of Cape Town, South Africa

Computer Electrical Engineering

With specialisations in Digital Signal Processing, Digital Systems, and Mobile Broadband Networks.

2010–2012

High School

Herzlia High School, South Africa

Matriculating with 7 distinctions

Experience

Part Time

2015–now

Rosetta Roastery

Cape Town, South Africa

Developer

Currently in the process of developing a coffee roast monitoring system, that tracks the development of beans being roasted. The project was executed using an Arduino, Adafruit Thermocouple and the Python Qt-framework that interfaced with a serial library.

Contact Jono Le Feuvre: +27

2014–2015

Thingking

Cape Town, South Africa

Summer Intern

Developed a digital periscope for a retail store in Johannesburg using a Unix back-end for interfacing with an Maxbotix Ultrasonic Rangefinder.

Contact Marc Nicolson: +27

2014–2015

Computer Science Tutor

Cape Town, South Africa

Employee of The University of Cape Town

Tutored both First and Second year Computer Science courses. The first year course was an introduction to programming concepts in Python, with tutorials varying from simple python constructs to recursion.

The Second year course consisted of modules in parallel programming in the Java Fork-Join Framework, computer architecture, and mobile application development using Android.

Contact Kevin Elliott: skiimilk@gmail.com

2013–2014

MacroLan

Cape Town, South Africa

Summer Intern

Observed and assisted Network Administrators and joined Network technicians on service calls, as well as helping in the technical support department.
